REMARKS

50X1-HUM

1. Between 25 and 30 January 1951, a barracks installation was seen southeast of the Lowicz (Q 53/P 27) railroad station, approximately 100 meters east of the railroad line to Warsaw, and about in line with the switch tower west of the railroad line. The installation consisted of two large four-story brick buildings, each about 30 meters long, and one garage, about 50 meters in length.
2. The barracks installation was fully occupied by motorized troops. Underground containers were being filled with fuel. Trucks which apparently belonged to the barracks shuttled between the installation and the freight yard. Their numbers could not be determined. \*

\* Comment. There has been no recent report on Polish troops in Lowicz. In September 1949, Lowicz was allegedly occupied by the 28th SP Arty Regt and one infantry regiment which probably belonged to the 8th Inf Div.
